Your World

Subtle Design | Powerful Results

The Aluria Cove Lighting System from Green Oxen is a powerful and simple-to-install solution for energy-saving lighting in offices, homes, businesses and hotels. The design creates a hidden aesthetic that is modern and casts a sophisticated reflective light that is soft, intimate, yet ubiquitous. Each fixture is custom built to fit any wall in any room. The industrial aluminum construction ensures a sturdy, seamless mount that disappears behind any room's accents.

The fixture comes with a full line of accessories and mounting hardware. The light source can be LED, T5 or T8 fluorescent bulbs to best suit the room's needs.

Whether you have new construction or you are looking to retrofit, please call Green Oxen today to discuss your lighting needs and to hear how Aluria is the perfect solution for modern, easily-controlled, intelligent lighting.

Smooth | Modern | Inexpensive

Mounting

Mounting the Aluria Cove Lighting System is easy and can be done in either of three ways. It can be mounted with the tab on the bottom caulked to the wall, taped and floated with drywall compound, or the extrusion can be mounted and a wall tile can be installed over the tab. Both methods provide a seamless adhesion to the wall that is sturdy and graceful.

Caulked
