

GREEN OXEN

- MODERN DESIGN SOLUTIONS -

THE GREEN OXEN STORY

Green Oxen is a family owned business founded in 2015 by brothers, Alex and Jamie Schlinkmann. After realizing the void for high-end aluminum products, Green Oxen was started with the mission to help developers of modern residences and commercial projects realize their vision through artfully designed products.

Located in Plantation, Florida, Green Oxen operates in a 75,000 square foot facility powered by a 75kw wind turbine that stands as a flag of commitment to a climate positive future.

Since its inception, Green Oxen's line of aluminum railings, doors, lights and baseboards have quickly caught the eye of homeowners and builders that aim to amplify their property value through high-end sustainable products.

The clever, modular product design is expertly engineered and manufactured in the USA by robotic equipment for extreme accuracy and consistency. With this technology, Green Oxen is able to design high-quality architectural systems that provide unique, modern, and attractive aluminum solutions to meet high-end commercial and residential needs. These in-house capabilities are what sets Green Oxen apart from the rest.

Following an eco-friendly philosophy since the company was founded, Green Oxen uses domestically and ethically sourced and recycled material to make their range of products. This is the hallmark of the brand, which first started in the wind power industry. Green Oxen also recycles leftover aluminum pieces to help lower the carbon footprint even further.

Aluria Cove Lighting

Subtle Design. Powerful Results.

The Aluria Cove Lighting System is a powerful and easy-to-install solution for energy saving and sustainable lighting in offices, homes, businesses, schools and hotels. The design creates a hidden aesthetic that is modern and sophisticated, yet reflects a soft and intimate light.

Each fixture is custom built to fit any wall in any room and comes with a full line of accessories and mounting hardware. Compatible lights are LED, T5 or T8.

From new construction buildings to residential retrofits, Aluria Cove is the perfect solution for modern, easily-controlled and intelligent lighting.

Aluria Cove Lighting

Mounting & Hardware

The Aluria Cove light is \$125/foot, with a maximum length of 20' feet for a single unit. Mounting hardware is included with your purchase. Please contact us with your wall measurements and specifications to get the appropriate type of mounting hardware for your length and wall type. You have the option to have our in-house experts install the lighting system for you or receive a self-installation kit with instructions.

Epulum Railing

Cable, Glass, Horizontal and Vertical. Stairs, Decks, Porches and Balconies. Interior and Exterior. Commercial and Residential. Sky's the limit.

The Epulum aluminum railings are a modular and highly engineered railing system that is perfect for interior or exterior balconies, stairs, decks and porches. The railings offer a weather resistant, low maintenance, sustainable and visually appealing alternative to common welded iron or metal picket choices without compromising on safety.

The Epulum aluminum railings are highly customizable and come in black, bronze, or silver – it's natural anodized aluminum color. Additionally, you have the option to paint the railings to your choosing with either AAMA 2604 or AAMA 2605 powder coat finishes.

Every Green Oxen railing is easy-to-install, cost effective and can be applied to any residential or commercial space.

Epulum Railing

Mounting & Hardware

The Epulum aluminum railings are \$495 per every 5' foot section and come in anodized bronze, black and silver, or painted to any color of your choosing with an AAMA 2604 or AAMA 2605 powder coat finish. The railings can be mounted on concrete, steel or wood with the option of floor or fascia mounting. Mounting hardware is included with your purchase, however, mounting may vary due to site conditions so we highly recommend you contact us with your measurements and specifications before placing your order. You will receive a rendering prior to your purchase and upon approval, will have the option to either have our in-house experts install the railing system for you or receive your self-installation kit with instructions.

Koli Interior Door

Like statement jewelry, but for the house.

Intelligently designed to bring a modern design element to any room in the house, the Koli interior door brings a proper balance of clean lines and alignment, while simultaneously leaving some room for creativity and a personal touch.

The Koli door serves two purposes: it's basic function as a room divider and a second one, providing a decorative and furnishing element to a room that communicates a personality and starts conversations.

The Koli door allows for the most creative configuration in the Green Oxen collection of products with its unlimited infill options.

From frosted white glass for a modern bathroom, to your child's artwork printed on acrylic for a colorful playroom, the door is highly customizable, easy-to-install and low maintenance.

Made in the USA of 100% ethically recycled aluminum, the Koli modern interior door adds value to your property and defines sustainable luxury living.

The Koli door is a door that makes a difference.

Koli Interior Door

Infill Options

The Koli interior door comes in a 9', 10' or 12' foot size range, however, custom sizing and styling is available for your project. Doors we have designed in the past include double swinging doors and large barn style doors. You can also select one of our infill styles, or create your own. Infill panel options include glass, wood, laminate, chalk paint, cowhide and various prints on acrylic. For a custom print, your image resolution needs to be a minimum of 450 dpi. Prices start at \$450 for a basic package and increase depending on the style, lock, hinges and whether you want to self-install or have one of our experts do it for you.

Vinson Baseboard

Easy to install, easy to clean and easy on the eyes.

Bring any room or hallway together with small, but powerful, visual details like designer baseboards that support the whole effect of tasteful, modern design.

The Vinson aluminum baseboard is engineered to protect the wall and floor of your room, but also balance the room's appearance with a modern design. The lightweight aluminum composition is easy to clean, corrosion resistant, and hard to damage.

The Vinson aluminum baseboard is sold in 4', 8' and 16' feet lengths and pairs well with Green Oxen's Koli interior door. The baseboard also comes with an LED light option that easily mounts under the board with a variety of colors including red, green, blue, daylight white and warm white. Prices start at \$5/foot.
